Dear Hiring Manager,

I am excited to apply for the Senior Machine Learning Engineer position at EvolutionIQ. With a strong background in machine learning, data-driven decision-making, and infrastructure optimization, I am eager to contribute to EvolutionIQ's mission of transforming the insurance space through AI-driven solutions.

At 101GenAI, I was part of the team that developed a healthcare-focused chatbot using RAG and LLMs (GPT-4.0, Claude 3), improving medical consultations and increasing user satisfaction by 20%. I also optimized data pipelines and inference models, reducing processing time by 15%.

At AT&T, I analyzed AWS network operations for enterprise clients, leading infrastructure upgrades that enhanced system reliability by 30% and reduced resolution times by 25%.

At US Radiology, I built predictive models and dashboards to analyze medical claims, lab results, and clinical data, improving patient triage efficiency and increasing reviewed cases by 16%.

I am highly proficient in Python, SQL, and machine learning frameworks and thrive in environments that require innovative problem-solving and collaboration. I welcome the opportunity to discuss how my expertise aligns with EvolutionIQ's goals.

Best regards,

Dhulfiqar Alshammaa
